Introduction

The Biomedical Advisor Chatbot is an artificial intelligence application developed to retrieve information from PDFs, enabling users to submit queries in natural language and receive responses with their correspondent cite.

System architecture

1. The user uploads PDF documents to the system
2. The system splits documents into small chunks and creates vector embeddings
3. When receiving a query, it finds the most relevant chunks
4. Google Gemini AI synthesizes a response based on the retrieved content

System Requirements

Python	Version 3.7.6 or higher
--------	-------------------------

Installation

Clone the repository from GitHub:

```
git clone https://github.com/monicamayorgac/Chatbot.git
cd Chatbot
```

Create and activate a new conda environment:

```
conda create -n chatbot_project python=3.10 -y
conda activate chatbot_project
```

Install all required Python packages:

```
pip install -r requirements.txt
```

Configuration

Get Your Google API Key

1. Go to Google AI Studio: <https://aistudio.google.com/app/apikey>
2. Sign in with your Google account
3. Click "Create API Key"
4. Copy the generated key

Configure the API Key

Choose one of the following methods.

Streamlit Secrets

Create a secrets file that Streamlit reads automatically:

```
mkdir -p .streamlit
echo 'GOOGLE_API_KEY = "your_key_here"' > .streamlit/secrets.toml
```

Manual Input

Enter the key in the sidebar when you run the application.

Using the Application

Open your terminal and run the following.

```
conda activate chatbot_project
streamlit run seminar_bot.py
```

Your default browser will open automatically at <http://localhost:8501>

Uploading Documents

1. Look at the sidebar on the left side of the screen
2. Under "Documents", click "Browse files"

3. Upload the desired PDFs
4. Click the "Process" button to index the documents

Asking Questions

1. Type your query in the chat input at the bottom
2. Press Enter or click the send button
3. The chatbot will search your documents and generate an answer

Troubleshooting

Error message	Solution
streamlit: command not found	The conda environment is not activated, run conda activate chatbot_project
API Key Required	Follow the configuration steps in Section 4 to set up your Google API key
Rate Limit Errors	Wait a few minutes and query again
PDF Loading Errors	Ensure PDFs contain selectable text and are not encrypted
